Troubleshooting

1104E and 1106E Industrial Engines

RF1 (Engine)
RH1 (Engine)
RK1 (Engine)
VK1 (Engine)

Important Safety Information

Most accidents that involve product operation, maintenance and repair are caused by failure to observe basic safety rules or precautions. An accident can often be avoided by recognizing potentially hazardous situations before an accident occurs. A person must be alert to potential hazards. This person should also have the necessary training, skills and tools to perform these functions properly.

Improper operation, lubrication, maintenance or repair of this product can be dangerous and could result in injury or death.

Do not operate or perform any lubrication, maintenance or repair on this product, until you have read and understood the operation, lubrication, maintenance and repair information.

Safety precautions and warnings are provided in this manual and on the product. If these hazard warnings are not heeded, bodily injury or death could occur to you or to other persons.

The hazards are identified by the "Safety Alert Symbol" and followed by a "Signal Word" such as "DANGER", "WARNING" or "CAUTION". The Safety Alert "WARNING" label is shown below.

⚠ WARNING

The meaning of this safety alert symbol is as follows:

Attention! Become Alert! Your Safety is Involved.

The message that appears under the warning explains the hazard and can be either written or pictorially presented.

Operations that may cause product damage are identified by "NOTICE" labels on the product and in this publication.

Perkins cannot anticipate every possible circumstance that might involve a potential hazard. The warnings in this publication and on the product are, therefore, not all inclusive. If a tool, procedure, work method or operating technique that is not specifically recommended by Perkins is used, you must satisfy yourself that it is safe for you and for others. You should also ensure that the product will not be damaged or be made unsafe by the operation, lubrication, maintenance or repair procedures that you choose.

The information, specifications, and illustrations in this publication are on the basis of information that was available at the time that the publication was written. The specifications, torques, pressures, measurements, adjustments, illustrations, and other items can change at any time. These changes can affect the service that is given to the product. Obtain the complete and most current information before you start any job. Perkins dealers or Perkins distributors have the most current information available.

⚠ WARNING

When replacement parts are required for this product Perkins recommends using Perkins replacement parts.

Failure to heed this warning can lead to premature failures, product damage, personal injury or death.

Troubleshooting Section

Electronic Troubleshooting
System Overview 5
Glossary 9
Electronic Service Tools 12
Indicator Lamps 14
Replacing the ECM 16
Self-Diagnostics 17
Sensors and Electrical Connectors 18
Engine Wiring Information 22

Programming Parameters
Programming Parameters 31
Factory Passwords 31
Flash Programming 31

System Configuration Parameters
System Configuration Parameters 33

Troubleshooting without a Diagnostic Code
Alternator Noise (Noisy Operation) 34
Alternator Will Not Charge (Charging Problem) 34
Battery 35
Can Not Reach Top Engine RPM 35
Coolant in Engine Oil 36
Coolant Temperature Is Too High 37
ECM Will Not Accept Factory Passwords 38
ECM Will Not Communicate with Other Systems or Display Modules 39
Electronic Service Tool Will Not Communicate with ECM 39
Engine Cranks but Will Not Start 40
Engine Has Early Wear 42
Engine Misfires, Runs Rough or Is Unstable 42
Engine Oil in Cooling System 44
Engine Stalls at Low RPM 45
Engine Vibration 46
Engine Will Not Crank 47
Excessive Black Smoke 48
Excessive Engine Oil Consumption 49
Excessive Valve Lash 51
Excessive White Smoke 51
Intake Air Temperature Is Too High 52
Intermittent Engine Shutdown 53
Intermittent Low Power or Power Cutout 54
Low Engine Oil Pressure 56
Low Power/Poor or No Response to Throttle 57
Mechanical Noise (Knock) in Engine 59
Noise Coming from Cylinder 60
