

SHOP MANUAL

ALLIS-CHALMERS

MODELS D-10, D-10 Series III, D-12 AND D-12 Series III

The tractor serial number is stamped on the left front of the torque tube. The engine serial number is stamped on the rear left side of the engine block.

All models are available in both standard or high clearance design. All types use adjustable front axles. D-10 tractors have narrower tread than D-12 tractors.

IMPORTANT

At tractor Serial Numbers D10-3501 and D12-3001, numerous changes were made in D-10 and D-12 tractors. D-10 Series III and D-12 Series III tractors, beginning at tractor serial number D10-9001 and D12-9001, also incorporate numerous additional changes. Where service procedure or specifications are affected, changes are noted in the text of this manual by serial number range. Check serial number of tractor prior to reference to manual.

FRONT SYSTEM

ADJUSTABLE AXLE

1. REMOVE AND REINSTALL. To remove the complete axle assembly, first remove hood and grille shell. Support tractor and detach drag link from steering arm. Remove nut (12—Fig. 1 or 2) then, move front axle forward away from the tractor.

On D-12 tractors, the intermediate arm (8—Fig. 2) is fitted with a bushing which should be renewed if clearance is excessive.

2. OVERHAUL. To renew axle pivot pin bushing (11—Fig. 1 or 2), first remove the axle as in paragraph 1 and renew bushing in a conventional manner.

Fig. 1—Adjustable front axle for D-10 tractors. High clearance and standard versions are similar.

2. Bumper
3. Spring
4. Bearing washers
5. Plug
- 6A. Left spindle arm
7. Left spindle support
11. Axle pivot pin bushing
12. Radius rod nut
13. Spring washer
15. Tie rod
16. Axle main (center) member
17. Right spindle support
18. Right spindle arm
19. Spindle bushings
20. Spindles
21. Axle support and pivot pin
