Truck Mounted Scavenger[®] Spreader

PARTS MANUAL

GEHL[®] AGRICULTURE

Introduction

When ordering service parts, specify the correct part number, full description, quantity required, the unit model number and serial number.

The Spreader model and serial numbers are on a plate located on the front, left corner of the Tank. "Right" and "left" are determined from a position standing behind the Spreader and facing in the direction of travel. From this position, the Expeller is on the "right" side.

GEHL® Company reserves the right to make changes or improvements in the design or construction of any part of the unit without incurring the obligation to install such changes on any previously delivered units.

Refer to the abbreviations table located on this page for the various fastener descriptions. Standard attaching hardware torque values are also provided on the inside back cover.

Items shown in the parts list that do not have Reference Numbers are shown for reference purposes only and are NOT available for purchase.

Unless otherwise specified, all cap screws or bolts are Grade 5, zinc plated; hexagon nuts for Grade 5 screws or bolts are Grade B; hexagon nuts for other screws or bolts are Grade A.

DECAL LOCATIONS

GENERAL INFORMATION

Decal locations information is provided to assist in the proper selection and application of new decals, in the event the original decals become damaged or the machine is repainted. Refer to the listing for the illustration reference number, part number, description and quantity of each decal provided in the kit. Refer to the appropriate illustrations for replacement locations.

NOTE: Refer to the *SAFETY* chapter for information on the safety decals in the decal kit.

To ensure proper selection for correct replacement decals, compare all of the various close-up location illustrations to your machine **BEFORE** starting to refinish the unit. Then circle each pictured decal (applicable to your machine) while checking off its part number in the listing. After you have verified all the decals needed for replacement, set aside unneeded decals for disposal.

NEW DECAL APPLICATION

Surfaces **MUST** be free from dirt, dust, grease and other foreign material before applying the new decal. To apply a solid-formed decal, remove the smaller portion of the decal backing paper and apply this part of the exposed adhesive backing to the clean surface while maintaining proper position and alignment. Slowly peel off the other portion of the backing paper while applying hand pressure to smooth out the decal surface.

WARNING

ALWAYS observe safety precautions shown on decals. If decals become damaged, or if the unit is repainted, replace the decals. If repainting, **BE SURE** that **ALL** decals from the kits that apply to your machine are affixed to your unit.
